# Barron's AP Chemistry Flash Cards, 2nd Edition

## Synopsis

Chemistry definitions, formulas, and structures, organized according to the College Board's six big ideas for AP Chemistry, are presented in question form on more than 500 separate flash cards, with explanations and chemical reactions indicated on the reverse side. The cards measure 4 1/2" x 2 3/4" and have a punch-hole in one corner that accommodates an enclosed metal key-ring-style card holder. The ring allows students to arrange the flash cards in any sequence that suits their study needs. Updated to reflect the brand new AP Chemistry exam that will be administered for the first time in May 2014, these cards are a valuable study aid, whether used alone or in tandem with Barron's AP Chemistry review book. BONUS! An exclusive online exam included with the purchase of the flash cards.

## Customer Reviews

The cards don't ask multiple choice questions, instead they give the student a problem to solve, a definition, or a concept to explain. The explanations in the back are thorough. It also gave my daughter a chance to figure out what she didn't understand and made it possible for me to be able to help her study.

We used these in my AP Chem class. The students liked them and would sit and go through them voluntarily on their own. They are durable and had a lot of information. Good general knowledge but no complex math etc.

I am actually disappointed in these cards... A lot of them are just - what is the formula of this compound? I wanted higher level review questions.

Excellent product that I would purchase again.

My kids enjoyed using these, they claim it helped them. I would recommend this product to others in the future.

10/10 I'm memorizing 5 cards every day, I'll be done in about 3-5 months

came with a lot more words than I was expecting. Covers every category. Helpful for students struggling with vocabulary.
