Manufacturing Facilities: Location, Planning, And Design, Third Edition

Synopsis

Fierce global competition in manufacturing has made proficient facilities planning a mandatory issue in industrial engineering and technology. From plant layout and materials handling to quality function deployment and design considerations, *Manufacturing Facilities: Location, Planning, and Design*, Third Edition covers a wide range of topics crucial to the efficiency of a well-planned facility. Proper Planning Thoroughly updated and revised, the third edition of this classic volume provides the information and analytical tools necessary to move from product designs to production plans and then details all of the planning techniques needed to build a manufacturing facility where safety, efficiency, and profit are interdependent. Divided into two parts, the first section describes all the factors involved in setting up a manufacturing plant. It covers product design, the choice of manufacturing processes, and plant layout, as well as production, material-handling, and storage systems. The author also highlights the importance of the selection of labor resources. Proper Location The second part examines subjective aspects, such as how to maximize efficiency and save resources. It discusses how to choose the best location and how to assign customers to each facility to minimize the overall cost of operation. It also reviews the process of selecting sites for proximity to emergency service facilities, and explains how to determine the best layout within a building for tool rooms, materials, machining, shipping, inspection, and other departments. Proper Attitude Wise planning results in efficient allocation of available resources for any project. This comprehensive reference empowers engineers, facility planners, and students in manufacturing programs to effectively develop both the method and the mindset required to create an efficient and integrated production facility.

Book Information

Hardcover: 824 pages

Publisher: CRC Press; 3 edition (December 22, 2008)

Language: English

ISBN-10: 1420044222

ISBN-13: 978-1420044225

Product Dimensions: 6.4 x 1.6 x 9.3 inches

Shipping Weight: 2.8 pounds

Average Customer Review: 5.0 out of 5 stars 1 customer review

Best Sellers Rank: #926,771 in Books (See Top 100 in Books) #114 in [Books > Business & Money > Processes & Infrastructure > Facility Management](#) #142 in [Books > Engineering &](#)

Transportation > Engineering > Industrial, Manufacturing & Operational Systems > Production, Operation & Management #285 inÃ Â Books > Business & Money > Processes & Infrastructure > Purchasing & Buying

Customer Reviews

Louisiana Tech University, Ruston, USA

I am satisfied with the book I received. The price is great and is strongly recommend it.
