Writing Term Papers With Cool New Digital Tools (Way Beyond PowerPoint: Making 21st Century Presentations)

Synopsis

In the not-too-distant past, students were expected to turn in only handwritten or typed papers. However, with today's ease of access to the Internet and free applications, teachers are now expecting students to go beyond the confines of text-only productions. Various online programs make it possible to create multi-layered term papers that are rich in images, audio, and even video. And most of these tools are free to use! Students can now access their work from nearly anywhere that has an Internet connection. In the case of collaborative research projects, this same technology allows team members to work with each other even when they are in different locations. A wide variety of online and offline tools, techniques, and tips to help students research, write, edit, prepare, and present term papers are discussed and explained here. This revelatory guidebook to the latest in term paper technology also supports Common Core Standards for the reading of technical accounts and texts.

Customer Reviews

Gr 6 Up "Maybe you and your students are familiar with apps like Evernote, SlideShare, Voki, and Dropbox. But how about Jing? Stupeflix? Cacao, anyone? This up-to-the-minute series identifies and discusses dozens of new and evolving tools for developing, sharing, and presenting ideas. Polling apps and phone-based teleprompters give debaters a leg up on their opponents; web-based reaction timers make data collection easier during science experiments; and citation software

organizes sources and formats a writer's bibliography automatically. These books excel in identifying apps and information sources but stop short of critiquing strengths and weaknesses, possibly because new digital tools are frequently updated and enhanced, meaning that any detailed review would quickly become obsolete. The books are also intensely text heavy, which seems at odds with their subject. A few screenshots are used as illustrations in each volume along with stock photos of teens in classrooms and adults making presentations. Not perfect, but a welcome addition.
