Articulation And Phonological Disorders: Speech Sound Disorders In Children (8th Edition)

Synopsis

The leading, most current and comprehensive review of information critical to the study of clinical phonology available. Long renowned for providing the most up-to-date, extensive coverage of the clinical literature in the area of speech sound disorders available, this leading resource has earned its status as a classic in the field and its rightful place on every speech, language, and hearing clinician's bookshelf. Readers get an introduction to the normal aspects of speech sound articulation, normal speech sound acquisition, classification and factors related to the presence of speech sound disorders, the assessment and remediation of speech sound disorders, and phonology as it relates to language and dialectal variations. Rather than prescribing a single approach to speech sound disorders, the authors present a range of perspectives on the nature, assessment and treatment of these disorders. *Articulation and Phonological Disorders* is primarily concerned with those disorders not etiologically associated with known or obvious sensory, structural or neuromotor deficits. Among the changes and updates to the Eighth Edition are an expanded focus on evidence-based practice, the reorganization of several chapters, and an updated discussion of childhood apraxia of speech.

Book Information

Hardcover: 400 pages

Publisher: Pearson; 8 edition (June 4, 2016)

Language: English

ISBN-10: 0134170717

ISBN-13: 978-0134170718

Product Dimensions: 8.7 x 0.7 x 10.9 inches

Shipping Weight: 2.2 pounds (View shipping rates and policies)

Among the changes and updates to the Eighth Edition are: An expanded focus on evidence-based practice. Reorganization of several chapters. An updated discussion of childhood apraxia of speech.

Dr. John Bernthal is Professor Emeritus of Special Education and Communication Disorders at the University of Nebraska--Lincoln. He has been a speech-language pathologist for over 40 years including employment in the public school, at several universities, and professor and Department Chair for over 30 years. He conducted research, taught and published in the area of speech sounds disorders. He is a past president of the American Speech Language Hearing Association, an ASHA fellow, and recipient of Honors of the Association. Dr. Nicholas Bankson is a Professor Emeritus of Communication Sciences and Disorders at James Madison University. He has had a 40-year career as a speech-language pathologist, including employment in the public schools, serving as the state supervisor of school programs in Kansas, plus 27 years as a department chair in Communication Sciences and Disorders at Boston University and James Madison University. His scholarly efforts have focused on speech sound disorders and assessment of language disorders in children. He is an ASHA Fellow, and is the recipient of the Honors of ASHA. Dr. Peter Flipsen Jr. is a Professor of Speech-Language Pathology at Pacific University. He has more than 20 years of experience in the field as a clinician, teacher, and researcher. He teaches courses in phonetics and speech sound disorders in children and has published more than 25 peer-reviewed journal articles in the field. His research has focused on classification of speech sound disorders, measurement of intelligibility of speech, and speech and language development in children with cochlear implants.

great

bought as a requirement for one of my classes...exactly the same as the one in the campus book

store

This book was required for an undergrad class on articulation and phonological disorders. It serves the purpose fine. I am keeping it as a reference rather than selling it back. It cost less here than it did in my university's book store, which is always nice.

A good reference, but beware of typos and poorly worded sentences which can cause some confusion.

Exactly what I needed, thank you!

It is a good read and thoroughly used by my prof.

Many evidence-based sources cited, which makes paperwork of a practicing SLP a bit easier

Lined up with class perfectly
