Customer Reviews

"There are no comparable books in this field and this one should hold a unique place as a reference for both physician scientists and clinicians. The new section on the pathophysiology of neonatal disease adds value to this already incomparable text." -Jay P. Goldsmith, MD (Tulane University School of Medicine), Doody's Score: 96 - 4 Stars!

I like a lot because it is a new way to study. It is a book to read slowly.
