A Manual For Writers Of Term Papers, Theses, And Dissertations, 6th Edition (Chicago Guides To Writing, Editing, And Publishing)

Synopsis

For close to sixty years Kate L. Turabian's *Manual for Writers* has offered comprehensive and detailed guidance to authors of research papers--term papers, theses, and dissertations. Now the editors of *The Chicago Manual of Style* have revised Turabian's *Manual* to bring the details of style into conformity with the fourteenth edition of *The Chicago Manual*. This new edition of Turabian also reflects the way students work today, taking into account the role of personal computers in the preparation and presentation of their papers. The familiar organization of this popular book remains largely unchanged. Chapter 1 describes the parts of a long formal paper. Chapters 2-5 introduce the mechanics of writing style, from abbreviations to quotations. Chapters 6 and 7 show how to prepare and refer to tables and illustrations. The section on documentation, chapters 8-12, describes two of the most commonly used systems of citation; these chapters provide many examples including guidance on how to cite electronic documents. Chapter 13, on manuscript preparation, shows how to take advantage of word processing software to present the elements of a paper clearly and effectively. Chapter 14 offers more than two dozen sample pages illustrating ways of formatting some of the complex features found in many research papers. Authoritative, comprehensive, easy to use, and filled with good sense, this new edition will be the standard for yet another generation of students and their teachers. Kate Turabian (1893-1987) was dissertation secretary at the University of Chicago from 1930 to 1958. This manual and her *Student's Guide for Writing College Papers* made her name so well known that she has become "part of the folklore of American higher education" (Quill and Scroll).

Book Information

Paperback: 318 pages

Publisher: University of Chicago Press; 6th edition (April 1, 1996)

Language: English

ISBN-10: 0226816273

ISBN-13: 978-0226816272

Product Dimensions: 8.4 x 5.8 x 0.8 inches

Shipping Weight: 12.8 ounces

Customer Reviews

Newly revised to conform with the Chicago Manual of Style, Turabian's Manual for Writers provides comprehensive, detailed, superior guidance to writers of research papers. From "Parts of the Paper" (including the niceties of copyrights and dedications) to "Sample Layouts," everything to do with format is covered. Mechanics of style (abbreviations to quotations) are reviewed, there's help on tables and illustrations, and chapters on bibliographies, parenthetical references, note taking, and citations. There are suggestions for manuscript preparation, hints on word-processing software, and formatting for research papers' more complex features. When you're up to your eyebrows in research data, it's a vast relief to have quick, accessible, reliable answers to your questions of structure, scholarly propriety, and academic style. --Stephanie Gold

A mainstay in high-school and college libraries for nearly 60 years, Turabian has now been updated to incorporate references to the fourteenth edition of The Chicago Manual of Style [RBB O 1 93]. Founding author Turabian died in 1987; this edition was revised by John Grossman and Alice Bennett, who edited the most recent edition of The Manual of Style. The arrangement of the book remains the same. Chapters 13 and 14 show the ubiquity of computers. It is assumed that students now write their papers on a PC; typewriter users are referred back to the previous edition. The documentation chapters tell how to cite CD-ROM and online sources, and the bibliography at the end of the book has been updated. However, much of the book is unchanged. Librarians will want to see what kind of condition their 1987 edition of this book is in when deciding whether to purchase this new one. Sandy Whiteley --This text refers to an out of print or unavailable edition of this title.

I am in the process of writing a research book on my father's World War II experience in Europe. Since his part of the war was not as popular as the airborne units or Patton's 3rd Army, it has taken considerable research trips to gather enough information to credibly document his unit. I needed some guidance to accurately cite my resources and describe what I found so that I could create a document worth reading. I have not begun the actual writing of my project as yet but this book has provided some direction in what to look for and how to organize my research.

Like every one else who writes research papers, I wish folks would pick one style and drop the rest. If I had my druthers, I'd use the APA format as it seems to be more prevalent. As a style guide, this

is a fine resource, but I would have liked more completed examples since I have to change from style to style and prefer looking at what's needed as opposed to reading a dry bit of writing on how to do it.

Had to buy this book so that I could write papers for a class. Used less than one chapter but this is the only place you can find the Turabian style of reference notation. Another academic scam.

I have been using Turabian since my high school years which was a long time ago. I never like having to consult Kate because that means I am writing some paper for a class. However, when formatting, footnoting or just plain questions about the written form of the English language, Kate never lets me down. This is the first time I have used the Kindle version and I like the search and "Go To" features to find exactly what I need. Good to see you again Kate and thanks.

Well worth the \$\$..It has chapters to help you define your topic or hypotheses. Chapters on research, Chapters on deciding who your audience is and then writing appropriately and Chapters on Chicago Style referencing are all included.This book is an easy to follow, step-by-step, writing manual that works for everything from writing High School papers to College and even early-Master's level papers.It has a great 'tree' of starting and then saying if you have your subject, skip to here, if you need to develop a question go to ____ chapter, and so on.Fairly inexpensive and well worth the money.

if your prof says follow it.. you have to get it.. so .. end of storyI just wish this came with the option of having it in a spiral binding .. as I use it when writing papers.. and flipping through it breaks the binding.. also I have tabs.. I put on the pages..I wish they would set this book up .. with spiral binding, tabs for easy access and quick finding of what you're needing to site..

Shipping was expected with no delays.I recommend this book if you're having trouble writing your papers for college. Detailed and easy to follow guideline. Plenty of examples to refer to.Really helped me with my research paper.Got this during a lightning flash deal for only \$11 or so! Worried that the condition might be bad but it wasn't beaten up and it arrived safely.

This book is pretty useful in writing. I wish it had a more robust intro for newbies though. It was daunting to read at first
