Customer Reviews

Baby Professor showcases a collection of subjects that are educational for kids to help them learn how to do something themselves, exactly how something is done or how it came about. Children love to learn through attractive visuals and Baby Prof. is ideal to get your child the head start he or she needs for the future. Our Motto - "Learning is Fun, so let's Make it Fun to Learn".

Good information but a bit long for younger children

The book seems thrown together to take advantage of the marketing opportunity of the eclipse. It poorly organized and totally lacks any organization. The pictures which seem to just grabbed from stock picture collections often have little to do with the text. If you hope to teach your child about eclipses, I would look elsewhere.

funtastic... lots of information in this one! the pictures are stunning and my son loved it... definitely

glad I bought it! wont have to pick up another book about this for sure...

The book uses simple language, but fails to define the key words penumbra and umbra. A glossary of terms would have been helpful.

Love the simplicity of the explanations.
