Building A Model Railroad Step By Step

Synopsis

Model Railroader Managing Editor David Popp details the expansion of his N scale Naugatuck Valley Railroad in *Building a Model Railroad Step by Step*, 2nd edition. Providing an inside look at building a model railroad from start to finish, new chapters highlight the addition of a sizable industrial switching area and delve deeper into operations.

Customer Reviews

David Popp is an associate editor for Model Railroader magazine. In addition to his interests in all-things railroad, he's been a high school English teacher, directed and acted in a number of different theater venues, writes music, and enjoys historical miniature war games. David and his wife, Ingrid, live in southeastern Wisconsin with their Mini-Cooper named Jack.

An excellent primer for model railroad hobbyists.

Nice write up. Helped in model railroad preparation. (Diane's husband wrote review)

A great book, I enjoyed reading it and save it for reference when working on my layout. Lots of helpful hints.

I bought this to see what is involved in building scenery should I decide to build a indoor model RR. The book had a great deal of information and ways to construct scenery, product information and

who sells it. Like a lot of these kinds of books, it may be a little basic for the advanced hobbyist but still, I'll bet anyone can get some good information from this book..

This book is not only for beginners. I has excellent information on several areas of the modeling industry. Good reference. Could be de-bound, tabbed and used as a reference guide. I have recommended this book to students and customers. I certainly recommend this book.

Just as described and arrived on time. No issues.

Wish I would have had this book earlier.

when starting to build a model railroad this book gives good tips and start up ideas, I would still recommend going to a model railroad club if there is one in your area. Even though the book is good you can still get overwhelmed.
