# Tattoo Removal: Establishing A Free Or Low-Cost Community-Based Program, A How-to Guide

## **Synopsis**

This only-one-of-its-kind how-to guide is the go-to reference for nonprofits, medical professionals, technicians, tattoo artists and anyone else who would like to create a free or low-cost tattoo removal program. It includes everything from how to decide the best service delivery model to follow and case studies of successful programs to directories of laser device suppliers and rental companies and schools that teach tattoo removal. It also includes the Jails to Jobs national directory of more than 250 free and low-cost tattoo removal programs in 43 states. The guide is published by Jails to Jobs, Inc., a San Francisco Bay Area based nonprofit that is part of the Global Homeboy Network and dedicated to equipping previously incarcerated and formerly gang-involved individuals with the tools and resources to find employment and successfully re-enter the workforce. Their most current directory of free and low-cost tattoo removal programs is maintained at its website. This how-to guide has also proven to be valuable information for anyone wanting to start or improve a for-profit tattoo removal business.

## **Customer Reviews**

While there are a couple of other books on tattoo removal and the advice on that in this book is excellent, but, to my knowledge, it is the only book that helps individuals or nonprofits to establish or improve a tattoo removal program. Particularly impressive are the crystalline presentation of the different models for providing such a service, potential funders and partners, a good-sized annotated list of programs, and a comprehensive set of forms, checklists, flow charts, etc. I sense that the tat fad is starting to fade. Alas, the tats aren't. This book will help anyone who'd like to help people clean up their act.

As an Australian looking to set up a service that offers exactly what this book discusses, this book has provided valuable insight into developing a fledgling idea into a concrete plan to get things off the ground. Highly recommended!
