Customer Reviews

"The committee thinks the books are well written, easy to follow, and they like the TI-NSpire technology throughout." --Education Ministry, Canada
"The Oxford IB course books are the best ever resource for both teachers and students. They are practical, insightful and fully in line with the IB Course outcomes." --Pat Hanson, IB Coordinator, Academy of the Holy Cross, USA
"We have adopted most of the Oxford course books for our school. We find them well written, well linked to TOK issues and age appropriate." --Sheta Saha, IB Coordinator, Chatsworth International School, Singapore

Peter Blythe, Jim Fensom, Jane Forrest and Paula Waldman de Tokman are all well-respected OUP authors.

This book is excellent. It contains all the aid I need for the course and even more. All the topics are well explained and contain more than enough practice problems. The book includes a cd with the digital book, which is great if you carry your laptop to school and you don't want to carry more books. The book includes complete chapters for TI procedures which are great if you are new to this type of calculators. This book is perfect for a math studies ib student.

Good

I purchased this book for my daughters, high school math class. Some classes now require you to supply your own book. It came in great condition and the price was pretty reasonable.

School text, must have.

Pretty good study guide

Interesting book. It will help me in tutoring one of my students.

It was the book required from my School's daughter. She is going to do the IB Diploma and she has to study math.
