Customer Reviews

DeLorme has been directly responsible for many of the major technological advances made in the mapping industry over the past 30 years.

I have numerous other DeLorme Atlases, Utah, Arizona, Florida...and they are all great products.

The Georgia version is AWFUL. No detail, the majority of roads are unmarked; very poor execution. When compared to Florida's Atlas, this one looks like a kid drew it up. Don't bother with this one; maybe try Rand McNally or another company.

Great tool for finding local roads and county borders that you would not otherwise see on an internet web search of the same area. The maps are very well organized and easy and quick to find even in a race style quick fashion. With a quick county/city look up page, this is a must for the DTT rally! The idea of this format is good but the details on the road level are poor. What I mean by that is secondary roads are shown but not labeled due to size limitations. It's the secondary roads that makes a map worth its paper and ink. My suggestion is either make the book larger, which may be a physical problem, or increase the page count at the existing size and add useful details. I'd pay a bit more money if I had such a publication.

Just what I needed to follow the minor roads to hiking trails in Georgia.

Makes it easier to see sections of a state that cannot be seen using a one page atlas picture. I travel all over my state and find it immensely useful. Good detail.

Compared to Florida Atlas, it is not as complete, but will work for me.

More detailed than road maps!

Doing some house hunting in Georgia and needed more detail than your usual road map, and a wider area than printing out a few online maps provide. These are great for that (I've also got a Texas version). Not something you likely need if you're just passing through, but if you live there, or plan to, it's worthwhile.
