Customer Reviews

Exactly what I needed! While nothing replaces a textbook and talented professor, this is a great way to test your knowledge while out and about or waiting somewhere. Repetition is key for memorization. For my medical school class, the knowledge/explanation on the cards regarding each structure is sufficient.

Perfect for the med student, high yield images

These laminated cards made a big difference in my histology preparation. They are informative, thorough and the pictures help to get a good grasp of important structures. Since they are portable, they are easy to carry to the library or a coffee shop. I recommend these cards to anyone who wants to enhance their preparations in histology.

Excellent

Awesome flash cards, love the fact it comes with a ring so it will be easy to maneuver when studying :)

These cards helped a lot for histology practical. I would recommend these flash cards for any level histology course.

These are very portable and easy to use. I would buy this product again. Totally worth the price. I plan on buying additional similar products.

I did not want info on tissue to look at, I wanted information on histotechnology? Not sure how these popped up?
