Customer Reviews

It explains the why go into LCHF and very clear on what you can eat and how and what you can't

I bought this book in March 2017 and then contacted one of the authors for an assessment and she worked out an Insulin Resistant eating plan for me and it has changed my life I have to date lost 29 kilograms and my waist measurement has gone from a 48 inch pair of jeans to a 38 inch pair of jeans. Most highly recommended

Great reference book for hanging and keto diet way of life! I would recommend it to all who are following!

The book itself is fantastic, informative and helpful! I am however a little dissapointed with the kindle version as the meal plans and food lists are not readable. I have tried on my kindle and on my pc.

Prof. Tim Noakes is one of my mentors changed my life and I am changing others! Thank you, Tim!

Great info.

I have been a trainer for 30 years. The low carbs I do agree with. Protein being low and fats even though they are good fats being high. I disagree. I have trained many clients from bodybuilders, models, average person and diabetics. The protein higher, carbs lower, and fats around 20% of total calories gets the job done.
