Came in very good shape and was exactly what I needed for my game.

The copy of this I received was actually a defect. Please do not think this is a complaint. I find it hilarious and enjoyable still. There were no errors minus the production line defect.

I love this game and this book has all the rules you need along with plenty of flavor and background. It's cleverly written and entertaining even when in the sections about rules. The only real weakness I see in the book is the layout. The page numbers listed on the table of contents don't usually match up with the actual pages that the chapters start on. Also the index is surprisingly sparse. If you're looking for a specific rule you'll probably have to do some searching. Overall it's a great book. If you want to try out the Vampire LARP then get this book.

This is a must have if you're playing Vampire the Masquerade, this is the core book it goes into how to make a player and all the advantages and disadvantages of each clan, as well as other important information.

This is LARP rules. You better know what your buying...but it is the best rule set anywhere.

I never leave for OWbN without it now. I have so many ideas and concepts now, it's amazing!

I just got this in the mail today and right on the cover, where it reads 'Vampire', someone book tapped the word CHEERS... to it. Um, what? Excuse me? This was not in the description of the book's condition. Next time, mention it, please. Luckily, the label was easy to remove. This must have been done to prevent book theft at a LARP...
