Lots of great info on popular conspiracies!

This book is an interesting study of Islam and its root to paganism like all religion. It is written an aggressive tone but it does provide excellent discussions and reference to the development of Islam .There is a vast amount of research done with hundreds of footnotes given so you can always go back and check where his information is coming from.

A tad bias but very revealing.

This book is a much needed add to the ever growing volume of literature threatening to expose the way the Moon has been used to justify slavery around the world in the past 2 to 500 years and beyond. It's about time the Moon nightmare ended and that time is now. This book goes further in exposing hoaxes and pyramid schemes such as moon cultism where the Moon is projected as some kind of a savior who can do anything from controlling women's menstrual cycles to inviting a bunch of crazy astronots, leaving people questioning the sanity of those who have promoted such

unspiritual and unscientific nonsense in the past and also in the present.

the flag is of low intelligent and a hate book that makes no sense at all Theism may be true in some ways The finder is AAA+

With a very aggressive language that may upset some, the books conveys and discusses a series of various aspects of Islam in the contemporary world. As I said the language is very strong in some points but the fact that Islam is connected with violence, warfare and abuses emerges clearly from the data collected in this book. One for all: in a British pool in the UK it emerged that 37% of the Muslim interviewee would not report terrorist related activities to the police if aware of any. Terrifying.

Mr Yoel searched the subject well, he exposed the "i wish it will go away" Islamic history and didn't fabricate anything, i know that because i am ex-muslem. he shows beyond doubt that allah is none but hellal or almuqah of the old moon cult and the evidences are not from far away, they are from what koran. many overwhelming evidences make muslem think AGAIN. but unfortunately Islam is a cult and as all knew cult prohibit thinking they just "DO IT". i hope all Muslims will buy this 2 volumes and read them, if you find them silly return them or burn them...but what if they tell the truth (the logically accepted truth)....one mistake from Mr Yoel book, he said there is no sura (chapter) in Koran named the sun...while sura number 91 named "the sun". thank you Mr Yoel and thank youyou freed our minds.

A must read for anyone that is interested in the future of the USA and the rest of the world. Both Vol. 1 & 2, have super footnotes, many charts and an excellent Glossary, everything to prove the point that the Prophet was a War and Moon God worshiper.
