Wish I had known about this in Art College, Greatest reference

This book is a very good reference for artistic anatomy. I honestly bought the book just for the section on the musculature of the head and neck, but I found quickly that this book has so much more to offer, for example, the comparative studies of human and primate cranio/facial structure. This book is rich with detailed illustrations, which in style resemble that of the the illustrations in the Jenő Barscay book. It presents a very thorough view beneath the skin of humans both male and female, offers insight on the direction of motion for joints etc and even presents a short but helpful section on basic drawing techniques. The animals chosen to be included in the book are well chosen and explored with an eye towards comparative anatomy. They provide a good sense of the variations of bone structure and musculature in vertebrates and I expect it will be an excellent source of information and ideas for anyone interesting in creating "beast" characters for fantasy illustration. This is a large book (weighing roughly 2 lbs) and, as such, it's not something you would haul out to the park for a day of sketching, but the lack of portability does not diminish the value of this book as a resource for any serious study of structural anatomy.

This book is amazing. There is so much information in here. Its so worth the money.

My second most substantial and referenced volume in my art studio. And one of few noteworthy Comparative Anatomy books out there.

This book is really cool!! My Instructor has a copy and told me that I should invest on getting it and I did.

The book is great as written, but seller advertised it as "almost Gift quality." We have different tastes, I chose it because of its quality, I could have gotten one a bit cheaper.

Delivered as promised and on time. The book is in perfect condition! Thanks!

This is a great book that as an artist I refer to regularly to make sure I get anatomical parts right. not a cheap book but well worth the money to get THE right book !
